

# JOB VACANCY – BIOMEDICAL ENGINEER

<b>Position:</b>	Biomedical Engineer (specialising in ventilation)
<b>Hours:</b>	37 hours per week, Monday to Friday
<b>Salary:</b>	Dependent on experience
<b>Location:</b>	Bromsgrove

Based in Bromsgrove, Hugo Technology work in partnership with medical device Original Equipment Manufacturers (OEMs), adapting to individual needs and requirements by offering a package tailored specifically to each customer. We offer a comprehensive service which includes the testing, calibration and repair of a wide range of medical equipment, from enteral feeding and infusion devices, to renal, patient monitoring and specialist surgical equipment. Work is carried out at our purpose-built premises, or across the UK by local Field Service Engineers. For further information regarding our business, please visit [www.hugotechnology.co.uk](http://www.hugotechnology.co.uk).

As a result of new opportunities and business growth, we are now recruiting for a Biomedical Engineer that has experience of working on Ventilators as part of their portfolio. The role will be based at our workshops in Bromsgrove. More details are shown below:

- 1) Assess, service and repair as required, ventilators and similar medical equipment in line with customer procedures
- 2) To ensure that key performance indicators are met for customers in this area, including repair turnaround times, reliability, PM completion.
- 3) Complete all service paperwork and documentation to the agreed standard.
- 4) Responsible for maintaining work area and test equipment in a safe, compliant and tidy condition.
- 5) Maintain compliance to all company standards and adhere to stated policies and procedures relating to Health & Safety and Quality Management.
- 6) To proactively seek to improve the process and service delivery provided by Hugo Technology Ltd.

Full training will be provided.

Availability for an immediate start would be an advantage. Own transport, or a means of getting to and from our premises on Saxon Business Park in Bromsgrove is essential.

## How to apply:
